

FRP Flights

Flights for sludge collectors used to be made from American cypress or synthetic wood, but they were difficult to work with because of their weight, and strong buoyancy while underwater could disengage the chains. FRP flights overcome these defects, as they are light and have no buoyancy. They also have superior corrosion resistance.

H (mm)	B (mm)	T ₁ (mm)	T ₂ (mm)	L (mm)	Mass (kg)
180	70	4	4	2,000	4.6
				2,500	5.7
				3,000	6.9
				3,500	8.0
				4,000	9.1
				4,500	10.3
				5,000	11.4
				5,500	12.6
				6,000	13.7

Note: 1. Total flight length should not exceed 6,000mm.
 2. Filler blocks are required to mount flights onto chains.
 Two sets of filler blocks will be provided for each flight.
